COMPANY PROFILE & CAPABILITIES

Interior fit-out packages

Dry-lining, ceilings, carpentry and finishes, delivered through one coordinated package.

METRIC-SERVICES LTD is a Portsmouth-based interior fit-out contractor supporting main contractors on projects nationwide. We undertake supply-and-fit interior packages and individual trade scopes for commercial, industrial and refurbishment projects.

From partitions and ceiling systems through to plastering, carpentry and decorating, we work with project teams to define the scope, coordinate delivery and complete the finishing details.

Our core services

Dry-lining & partitions

Metal stud partitions, wall linings, dot and dab, shaft walls, column encasements, insulation and pattresses.

Ceiling systems

MF and suspended grid ceilings, ceiling tiles, bulkheads, perimeter margins and access hatches.

Plastering

Skimming to new plasterboard and existing surfaces, preparation, patch repairs and making good.

Tape & jointing

Joint treatment and finishing to plasterboard walls, ceilings and associated details.

Carpentry & joinery

Timber framing, second-fix carpentry, door and doorset installation, skirtings, trims and associated joinery installation.

Decorating & enabling works

Mist coats, painting, strip-out and alterations associated with the agreed interior package.

Planning, procurement & delivery

I remain directly involved in planning and delivery, coordinating labour and materials around the agreed programme. We review drawings and quantities, check specifications and lead times, and arrange deliveries to suit site access, storage and the sequence of work. Progress and changes are discussed with the project team so issues can be addressed early.

Quality & safety

Work is checked as it progresses, with site records and snagging used to follow issues through to completion. I hold an NVQ Level 6 Diploma in Construction Management, SMSTS and first-aid training. IPAF-trained operatives support access-platform work. Company credentials include ISO 9001 and SMAS, with Citation support and site-specific RAMS.

Project references available on request.

We would be happy to price any upcoming interior fit-out packages you may have.

PROJECT PHOTOGRAPHS

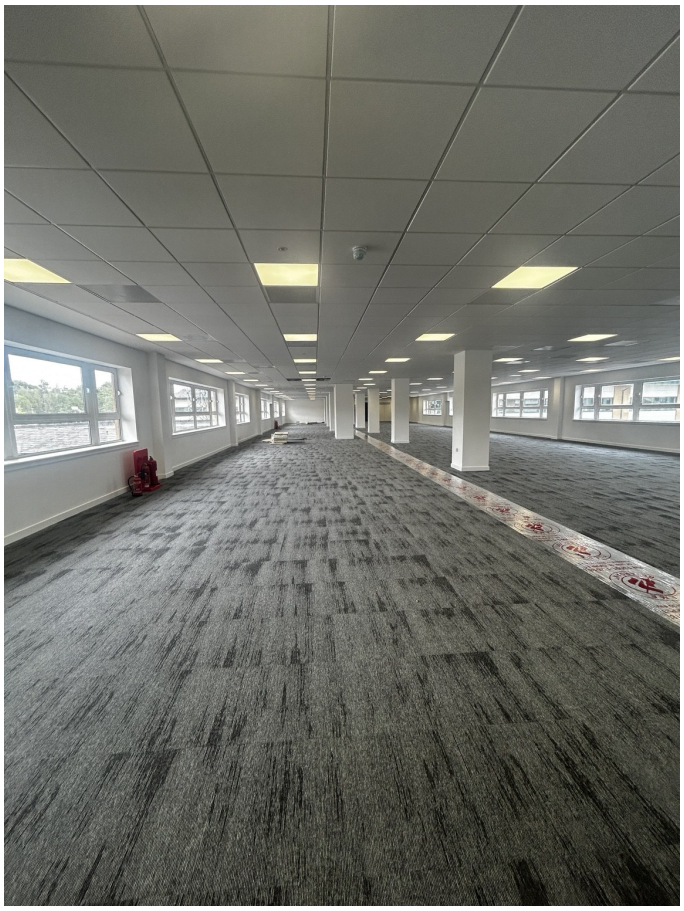

Cody Technology Park

Building A8, Farnborough | Suspended grid ceiling works

BEFORE

AFTER

Grid ceiling works at Cody 8

Scope included partitions and linings, MF and suspended grid ceilings, bulkheads, fire curtains, tape and jointing, plastering, decorating and carpentry across four office areas and six cores. The photographs show before and after approximately 1,600 m² of grid ceiling works, with fire breaks at 14-metre intervals within the ceiling void and fire curtains delivered as part of our package, with installation and certification carried out by a specialist subcontractor.

Manor Inn Hotel

Hotel refurbishment | Partitions and feature ceilings with a plastered finish

PARTITION INSTALLATION

PLASTER FINISHING

Construction phase - partitions and feature ceilings

Interior fit-out works as part of the full refurbishment of this 28-bedroom hotel, including the lobby, restaurant and plant rooms. Scope included dry-lining, ceilings, partitions, dot and dab, bulkheads, feature ceilings, plastering and selected decorating works. The photographs show partition installation and plaster finishing to feature ceilings during construction.

London | Office fit-out

KITCHEN INSTALLATION

DOOR SUPPLY

Office fit-out - construction through to final installation

Scope included demolition and strip-out, ceilings, partitions, bulkheads, plastering and carpentry, including fire-door installation, kitchen units, bespoke seating, a bespoke reception desk, furniture and skirtings, plus feature signage and slatted details. We also relocated and reinstated kitchen units, bespoke furniture and artwork, and installed TVs and shelving throughout the building.
